

NEA-100

Non-Emulsifying Agent

NEA-100 is a non-ionic non-emulsifier designed to aid in the prevention of emulsions caused during the acidizing process.

NEA-100 delivers extremely quick break times upon acid/oil contact, this eliminates the chance of pore throats being plugged by emulsions.

NEA-100 is excellent in the penetration and breaking of existing emulsions created by previous stimulations.

Specific Gravity:	1.06
Appearance/Odor:	Amber/Alcohol to Sweet Aroma
Flash Point:	118
pH:	< 2

NEA-100 is recommended at a loading of 3 to 8 gpt, based on the severity of the damage and desired acid strength. It is also suggested that samples be taken when possible as to ensure the most optimum performance and cost effectiveness.
