

# ***PFI-440***

## Packer Fluid Inhibitor

### **General**

---

**PFI-440** is a water-soluble, oil insoluble corrosion inhibitor. This liquid product is specifically formulated to mitigate all aspects of corrosion, which potentially can occur in packer fluids in oil and gas wells.

### **Chemical Description**

---

**PFI-440** is a combination of film forming amines, neutralizing amines, oxygen scavenger, and surfactants.

### **Recommended Uses**

---

**PFI-440** is recommended as a corrosion inhibitor for packer fluids. It is one treatment that is specifically formulated as an inhibitor for these systems.

### **Suggested Treating Methods**

---

Treating ratios for **PFI-440** vary from 5 to 8 gallons per 10 bbls. depending on the type of water used and the temperature of the static fluid.
